

# The Anti-Viral Gut

## REFERENCES

# INTRODUCTION

**About one in ten people are completely immune to HIV and will never become infected:** Johanne Poudrier, et al., "Natural Immunity to HIV: A Delicate Balance Between Strength and Control", Clin Dev Immunol. 2012.

**A 2021 study from Duke University used records from past outbreaks:** Marco Morani, et al., "Intensity and frequency of extreme novel epidemics", PNAS 2021.

**Your microbiome is constantly changing, responding dramatically to shifts in your diet:** Lawrence David, et al., "Diet rapidly and reproducibly alters the human gut microbiome", Nature 2013.

**Recuperating outside in the fresh air during the Spanish flu epidemic of 1918 reduced death:** Richard Hobday, et al., "The Open-Air Treatment of Pandemic Influenza", Am J Public Health 2009.

# CHAPTER 1

**Our formal understanding of these tiny creatures dates to the 1600s:** “The Royal Society: Science in the Making”.

**Like David Vetter, the famous “boy in the bubble”:**

“The Story of David Vetter”, Immune Deficiency Foundation.

**That’s what researchers in Boston found when they identified people:** Jose Mateus, et al., “Selective and cross-reactive SARS-CoV-2 T cell epitopes in unexposed humans”, Science 2020.

**Another example of protective adaptive immunity was seen with the 2009 H1N1 influenza strain:** Samit Joshi, et al., “Pandemic Influenza H1N1 2009, Innate Immunity, and the Impact of Immunosenescence on Influenza Vaccine”, Yale J of Biol Med 2009.

**One example is the startling increase in the incidence and severity of food allergies:** Rod Herman, “Increasing allergy: are antibiotics the elephant in the room?” Allergy, Asthma, and Clinical Immunology 2020.

***Bacteroides fragilis* and other commensals in your digestive system are the ones:** Osagie Eribo, et al., “The Intestinal Commensal, *Bacteroides fragilis*, Modulates Host Responses to Viral Infection and Therapy”, Infect Immunol 2022.

**Anti-viral proteins from specific gut bacteria are injected into mice suffering from Rotavirus:** Benyue Zhang, et al., "Prevention and cure of rotavirus infection via TLR5/NLRC4-mediated production of IL-22 and IL-18", Science 2014

**Bacteria like *Lactobacillus* outsmart viruses like coronavirus:** Vanessa Lievin-Le Moal, et al., "Anti-Infective Activities of Lactobacillus Strains in the Human Intestinal Microbiota: from Probiotics to Gastrointestinal Anti-Infectious Biotherapeutic Agents", Clin Microbiol Rev 2014.

**The microbiome predicted development of severe respiratory symptoms and death:** Doyle Ward, et al., "The Intestinal and Oral Microbiomes are Robust Predictors of COVID-19 Severity—the Main Predictor of COVID-19 Related Fatality", medRxiv 2021

**The relationship between *F. prausnitzii* and viral infections is clear and direct:** Yun Kit Yeoh, et al., "Gut microbiota composition reflects disease severity and dysfunctional immune responses in patients with COVID-19", Gut 2021

**If you are turning to herbicides regularly, there is something wrong with your approach:** Adrian Higgins, "Whether or not Roundup is safe, the gardener has better options", Washington Post 2019.

## CHAPTER 2

### **These viral remnants in our genetic code:**

Linda Van Blerkom, "Role of Viruses in Human Evolution", Am J Phys Anthropol 2003.

### **Chronic viral infection may actually provide you with immune benefits:**

David Pride, "Viruses Can Help Us as Well as Harm Us", Scientific American 2020.

**Both mice and humans infected with herpes are less susceptible to bubonic plague:** Erik Barton, et al., "Herpesvirus latency confers symbiotic protection from bacterial infection", Nature 2007.

## CHAPTER 3

**About a fifth of the 3,050 people aboard *Explorer of the Seas*:** “Vessel Sanitation Program”, Centers for Disease Control and Prevention 2014.

**They’re in the top ten most prescribed drugs in the world:**

Hongli Luo, et al., “Changes in proton pump inhibitor prescribing trend over the past decade and pharmacists’ effect on prescribing practice at a tertiary hospital”, BMC Health Services Research 2018.

**Research suggests the drugs are unnecessary in as many as 80 percent of people taking them:** Joel Heidelbaugh, et al.,

“Overutilization of proton-pump inhibitors: what the clinician needs to know”, Therap Adv Gastroenterol. 2012

**In 2020, a large national health survey involving over 53,000 patients:**

Christopher Almario, et al., “Increased Risk of COVID-19 Among Users of Proton Pump Inhibitors”, Am J Gastroenterol 2020.

**Another study with over 100,000 participants:** Seung Won Lee, et al.,

“Severe clinical outcomes of COVID-19 associated with proton pump inhibitors: a nationwide cohort study with propensity score matching”, Gut 2021.

**Of the sixty choir members, fifty-three developed COVID:**

Lea Hamner, et al., “High SARS-CoV-2 Attack Rate Following Exposure at a Choir Practice—Skagit County, Washington, March 2020.

Morbidity and Mortality Weekly Report, Centers for Disease Control and Prevention 2020.

**In the most recent Ebola outbreak, 3 percent of infected patients:**

Max Lau, et al., "Spatial and temporal dynamics of superspreading events in the 2014–2015 West Africa Ebola epidemic", PNAS 2017.

**Mucins in both saliva and breast milk have anti-viral activity:**

Anwar Suleman Mall, et al., "Mucus and Mucins: do they have a role in the inhibition of the human immunodeficiency virus?" Virology Journal 2017.

**In the late 1800s, the pharmaceutical company Bayer started promoting:**

"The Dangerous Ingredients Once Used in Overnight Cough Syrups", Healthline 2020.

**In 1927, the Austrian neuropsychiatrist Julius Wagner-Jauregg:**

Cynthia Tsay, "Julius Wagner-Jauregg and the Legacy of Malarial Therapy for the Treatment of General Paresis of the Insane", Yale J Biol Med. 2013.

**A high temperature can cause brief benign seizures:**

"Febrile Seizures Fact Sheet", National Institute of Neurological Disorders and Stroke.

**Replication rate of poliovirus at normal body temperatures is 250 times higher:**

Jose Romero, et al., "Poliovirus", Science Direct 2015.

**Ibuprofen and acetaminophen have been associated with prolonged influenza infection:**

Sally Evers, et al., "The effect on mortality of antipyretics in the treatment of influenza infection: systematic review and meta-analysis", J R Soc Med 2010.

**In some studies they've been found to delay the resolution of chickenpox:**

Sylwia Wrotek, et al., "Let fever do its job", Evol Med Public Health 2021.

**Housing laboratory mice at cool temperatures leads to changes:**

Claire Hankenson, et al., "Effects of Rodent Thermoregulation on Animal Models in the Research Environment", Comp Med 2018.

**Fever can inhibit the growth of certain tumors by damaging the metabolism:** Ralf Kleef, et al., "Fever, Pyrogens and Cancer", National Library of Medicine.

**Experimental ARDS rat model, several hours of fever stopped cell death:** Anthony Guihur, et al., "Moderate Fever Cycles as a Potential Mechanism to Protect the Respiratory System in COVID-19 Patients", Front Med 2020.

## CHAPTER 4

***Staphylococcus epidermidis*, a common bacteria found in your nose, can suppress:** Hyun Juk Kim, et al., "Nasal commensal *Staphylococcus epidermidis* enhances interferon- $\Lambda$ -dependent immunity against influenza virus", *Microbiome* 2019.

***Staphylococcus aureus*, which commonly colonizes your upper respiratory tract:** Jian Wang, et al., "Bacterial colonization dampens influenza-mediated acute lung injury via induction of M2 alveolar macrophages", *Nat Commun* 2013.

**If your microbiome is rich in helpful *Bacteroidetes* species:** N.V. Patin, et al., "The Role of the Gut Microbiome in Resisting Norovirus Infection as Revealed by a Human Challenge Study", *mBio* 2020.

**Women with high levels of protective *Lactobacillus* species in their vagina:** Yiwen Han, et al., "Role of Vaginal Microbiota Dysbiosis in Gynecological Diseases and the Potential Interventions", *Front Microbiol* 2021.

***Actinobacteria* species increase the response to hepatitis B virus vaccines:** Annalisa Ciabattini, et al., "Role of the Microbiota in the Modulation of Vaccine Immune Responses", *Front Microbiol* 2019.

**A major review published in the journal *Nature* in 2020 analyzed forty-one:** Arnau Vich Vila, et al., "Impact of commonly used drugs on the composition and metabolic function of the gut microbiota", *Nature* 2020.

**Five days of a broad-spectrum antibiotic:** Laura Cox, et al., "Antibiotics in early life and obesity", Nat Rev Endocrinol 2014.

**Research published in the *International Journal of Molecular Sciences* in 2021:** Aparna Shil, et al., "Artificial Sweeteners Negatively Regulate Pathogenic Characteristics of Two Model Gut Bacteria, *E. coli* and *E. faecalis*", Int J Mol Sci 2021.

**Just one drink per day in women and two in men can induce dysbiosis:** Javier Calleja-Conde, et al., "The Immune System through the Lens of Alcohol Intake and Gut Microbiota", Int J Mol Sci 2021.

**Glyphosate causes dysbiosis in poultry:** Anthony Samsel, et al., "Glyphosate, pathways to modern diseases II: Celiac sprue and gluten intolerance", Interdiscip Toxicol 2013.

**Dr. Paolo Lionetti, a pediatric gastroenterologist and microbiome researcher:** Carlotta de Filippo, et al., "Impact of diet in shaping gut microbiota revealed by a comparative study in children from Europe and rural Africa", Proc Natl Acad Sci USA 2010.

**In mice infected with influenza, high levels of SCFAs:** Valentin Sencio, et al., "Influenza Virus Infection Impairs the Gut's Barrier Properties and Favors Secondary Enteric Bacterial Infection through Reduced Production of Short-Chain Fatty Acids", Infect Immun 2021.

**A Japanese study published in the *American Journal of Rhinology & Allergy* in 2021:** Tetsuji Takabayashi, et al., "Regulation of the Expression of SARS-CoV-2 Receptor Angiotensin-Converting Enzyme 2 in Nasal Mucosa", American Journal of Rhinology & Allergy 2021.

**In a recent study from the University of Michigan Medical School:** Mahesh Desai, et al., "A Dietary Fiber-Deprived Gut Microbiota Degrades the Colonic Mucus Barrier and Enhances Pathogen Susceptibility", Cell 2016.

## CHAPTER 5

**Taking bacteria normally found in the digestive tracts of rats:**

Tamaki Yamada, et al., "Mucosal injury and inflammation in a model of chronic granulomatous colitis in rats", *Gastroenterology* 1993.

**Microbiologist Heenam Kim, from Korea University's Laboratory:**

Heenam Kim, "Do an Altered Gut Microbiota and an Associated Leaky Gut Affect COVID-19 Severity?", *mBio* 2021.

**With severe viral infections there is a steep increase in permeability:**

Vincenzo Cardinale, et al., "Intestinal permeability changes with bacterial translocation as key events modulating systemic host immune response to SARS-CoV-2: A working hypothesis", *Dig Liver Dis* 2020.

**But people with MIS also have something else going on:**

Lael Yonker, et al., "Multisystem inflammatory syndrome in children is driven by zonulin-dependent loss of gut mucosal barrier", *J. Clin Invest* 2021.

## CHAPTER 6

**Neuroscientist Matthew Walker describes a global real-life**

**experiment in sleep loss:** Matthew Walker, "Why We Sleep: Unlocking the Power of Sleep and Dreams", 2017.

**People who are regularly sleep deprived have an 88 percent greater**

**risk:** Hyunju Kim, et al., "COVID-19 illness in relation to sleep and burnout", BMJ 2021.

**People who get eight hours of sleep a night have higher levels of T**

**cells:** Stoyan Dimitrov, et al., "Gqs-coupled receptor signaling and sleep regulate integrin activation of human antigen-specific T cells", J Exp Med 2019.

**People who got at least seven hours of sleep were four times**

**less likely:** Aric Prather, et al., "Behaviorally Assessed Sleep and Susceptibility to the Common Cold", Sleep 2015.

**Fewer than four hours of night sleep is correlated with a 70 percent**

**drop in critical immune cells:** Luciana Besedovsky, et al., "Sleep and immune function", Pflugers Arch 2012.

**The flu vaccine was more effective in people who got sufficient sleep:**

Aric Prather, et al., "Temporal Links Between Self-Reported Sleep and Antibody Responses to the Influenza Vaccine", Int J Behav Med 2020.

**A classic study at Carnegie Mellon University:** Sheldon Cohen, et al.,

"Chronic stress, glucocorticoid receptor resistance, inflammation, and disease risk", PNAS 2012.

**A study published in *Annals of Internal Medicine* looked at adults fifty and older:** Bruce Barrett, et al., "Meditation or exercise for preventing acute respiratory infection: a randomized controlled trial", Ann Fam Med 2012.

**A University of North Carolina– Chapel Hill study found that men with HIV:** Jane Leserman, et al., ""Denial Speeds Progression To AIDS", Science Daily 2000.

**Chronic stress is considered a significant risk factor for poor outcomes:** Steven Lamontagne, et al., "Does inflammation link stress to poor COVID-19 outcome?", Stress & Health 2020.

**Catecholamines can increase levels of harmful gut bacteria ten thousand–fold:** Annelise Madison, et al., "Stress, depression, diet, and the gut microbiota: human–bacteria interactions at the core of psychoneuroimmunology and nutrition", Curr Opin Behav Sci 2019.

**In a well-known experiment looking at the impact of academic stress on college students:** Simon Knowl4s, et al., "Investigating the role of perceived stress on bacterial flora activity and salivary cortisol secretion: A possible mechanism underlying susceptibility to illness", Biol Psychol 2008.

**A 2021 publication on the neurobiology of stress:** Eva Johan Peters, et al., "To stress or not to stress: Brain-behavior-immune interaction may weaken or promote the immune response to SARS-CoV-2", Neurobiology of Stress, 2021.

**With the 2009 H1N1 outbreak, people who were obese had more severe disease:** Oliver Morgan, et al., "Morbid Obesity as a Risk Factor for Hospitalization and Death Due to 2009 Pandemic Influenza A(H1N1) Disease", PLoS One 2010.

**78 percent—of U.S. patients hospitalized with COVID have been overweight or obese:** Lyudmyla Kompaniyets, et al., "Body Mass Index and Risk for COVID-19–Related Hospitalization, Intensive Care Unit Admission, Invasive Mechanical Ventilation, and Death—United States, March–December 2020", CDC Morbidity and Mortality Weekly Report 2021.

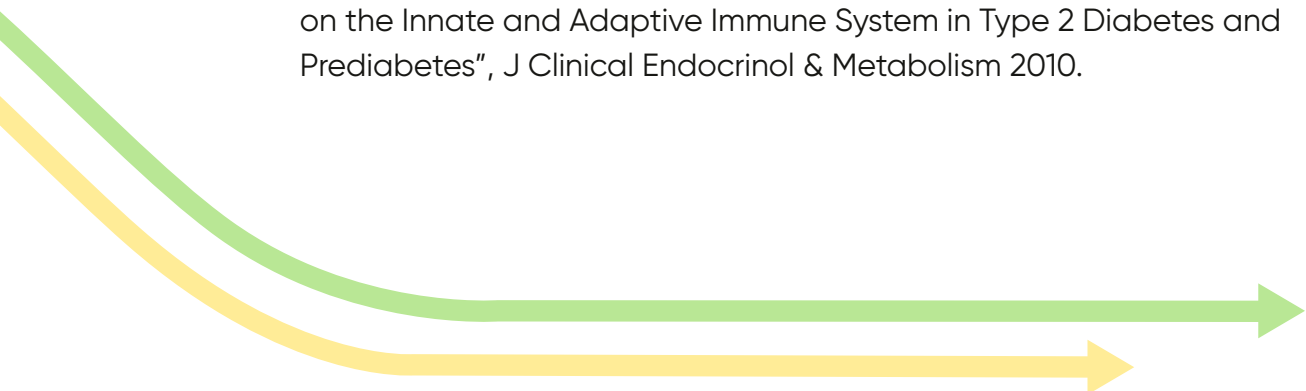

**In a large analysis of almost half a million patients:** Barry Popkin, et al., "Individuals with obesity and COVID-19: A global perspective on the epidemiology and biological relationships", Obesity Reviews 2020.

**At least thirty previously unknown viruses have been identified since 1973:** "The Global Infectious Disease Threat and Its Implications for the United States", Infectious Diseases 2000.

**Influenza virus shedding is 42 percent longer in obese compared to lean individuals:** Valeria Guglielmi, et al., "Susceptibility and Severity of Viral Infections in Obesity: Lessons from Influenza to COVID-19. Does Leptin Play a Role?", Int J Mol Sci 2021.

**Researchers at Washington University in St. Louis took gut bacteria from identical twins:** Vanessa Ridaura, et al., "Cultured gut microbiota from twins discordant for obesity modulate adiposity and metabolic phenotypes in mice", Science 2013.

**Australian researchers showed over a decade ago:** A Viardot, et al., "The Effects of Weight Loss and Gastric Banding on the Innate and Adaptive Immune System in Type 2 Diabetes and Prediabetes", J Clinical Endocrinol & Metabolism 2010.

## CHAPTER 7

**Prior infection with EBV dramatically increases the odds of developing multiple sclerosis:** Kjetil Bjornevik, et al., "Longitudinal analysis reveals high prevalence of Epstein-Barr virus associated with multiple sclerosis", *Science* 2022.

**Persistent symptoms in a high percentage of COVID patients:** Angelo Carfi, et al., "Persistent Symptoms in Patients After Acute COVID-19", *JAMA* 2020.

**The most significant risk factors for developing long COVID:** Yapeng Su, et al., "Multiple early factors anticipate post-acute COVID-19 sequelae", *Cell* 2022.

**Study that has contributed greatly to our understanding of the mechanisms behind long COVID:** Qin Liu, et al., "Gut microbiota dynamics in a prospective cohort of patients with post-acute COVID-19 syndrome", *Gut* 2022.

**60 percent had ongoing heart inflammation:** Valentina Puntmann, et al., "Outcomes of Cardiovascular Magnetic Resonance Imaging in Patients Recently Recovered From Coronavirus Disease 2019 (COVID-19)", *JAMA Cardiol* 2020.

**Researchers at Cornell, who in a study published in the journal *Microbiome*:** Ludovic Giloteaux, et al., "Reduced diversity and altered composition of the gut microbiome in individuals with myalgic encephalomyelitis/chronic fatigue syndrome", *Microbiome* 2016.

**A six-fold increased risk of IBS after infection:** Maroon Thabane, et al., "Post-infectious irritable bowel syndrome", World J Gastroenterol 2009.

**And antipsychotics can all increase the risk of dementia after COVID:** Yun Freudenberg-Hua, et al, "Psychotropic Medication Use Is Associated With Greater 1-Year Incidence of Dementia After COVID-19 Hospitalization", Frontiers in Medicine 2022.

**A study presented at the American Heart Association's Epidemiology, Prevention, Lifestyle:** Brellenthin, et al., "Healthy lifestyle behaviors reduced dementia risk despite family history of dementia", American Heart Association's Epidemiology, Prevention, Lifestyle & Cardiometabolic Health Conference 2021.

## CHAPTER 8

**Researchers from the American Gut Project published the largest human microbiome study:** Daniel McDonald, et al., “American Gut: an Open Platform for Citizen Science Microbiome Research”, mSystems 2018.

**A report from the National Cancer Institute on the status of the American diet:** “Only 1 in 10 Adults Get Enough Fruits or Vegetables”, CDC Morbidity & Mortality Weekly 2017.

**Eating fermented foods every day resulted in marked reductions:** Hannah Wastyk, et al., “Gut-microbiota-targeted diets modulate human immune status”, Cell 2021.

**Losing just 2 percent of your body's water can decrease skin elasticity and strength:** DeAnn Liska, Et al., “Narrative Review of Hydration and Selected Health Outcomes in the General Population”, Nutrients 2019.

**Dehydrated women performed much worse on tasks:** Hilary Bethancourt, et al., “Cognitive performance in relation to hydration status and water intake among older adults, NHANES 2011–2014”, Eur J Nutrition 2020.

**People who exercised at least five days a week had a 50 percent lower risk:** Robert Sallis, et al., "Physical inactivity is associated with a higher risk for severe COVID-19 outcomes: a study in 48 440 adult patients", British J Sports Medicine 2021.

**Professional rugby players in the midst of their training season:** Siobhan Clarke, et al., "Exercise and associated dietary extremes impact on gut microbial diversity", Gut 2014.

## CHAPTER 10

**Participants suffering from insomnia drank either 16 ounces of tart cherry juice:** Glyn Howatson, et al., "Effect of tart cherry juice (*Prunus cerasus*) on melatonin levels and enhanced sleep quality", *Eur J Nutr* 2012.

**Studies show that melatonin can help you fall asleep about seven minutes faster:** Eduardo Ferracioli-Oda, et al., "Meta-Analysis: Melatonin for the Treatment of Primary Sleep Disorders", *PLoS One* 2013.

**Observation made over a century ago and put to use during the Spanish flu epidemic of 1918:** R Hobday, "The open-air factor and infection control", *Journal of Hospital Infection* 2019.

**Sunlight levels are inversely correlated with influenza transmission:** Michael Schuit, et al., "The Influence of Simulated Sunlight on the Inactivation of Influenza Virus in Aerosols", *J of Infect Dis* 2019.

**Sunlight actually "energizes" T cells:** Theu Phan, et al., "Intrinsic Photosensitivity Enhances Motility of T Lymphocytes", *Nature* 2016.

**The number and activity of killer cells increased after two-hour walks in a forest park:** Qing Li, et al., "A day trip to a forest park increases human natural killer activity and the expression of anti-cancer proteins in male subjects", *J Biol Regul Homeost Agents* 2010.

**Spending at least two hours in nature every week:** Matthew White, et al., "Spending at least 120 minutes a week in nature is associated with good health and wellbeing", *Scientific Reports* 2019.

## CHAPTER 12

**Antibiotic-resistant infections kill more Americans every year:**

“Antibiotic Resistant Threats in the United States”, CDC 2019.

**In clinical trials, administering certain combinations of high-dose**

**probiotics:** Gabriella D’Ettorre, et al., “Challenges in the Management of SARS-CoV2 Infection: The Role of Oral Bacteriotherapy as Complementary Therapeutic Strategy to Avoid the Progression of COVID-19”, Front Med 2020.
